1ST SESSION

S. 2185

To require the Secretary of the Treasury to mint coins in recognition of
the fight against breast cancer.

IN THE SENATE OF THE UNITED STATES

OCTOBER 20, 2015

Ms. HEITKAMP (for herself, Ms. AYOTTE, Ms. COLLINS, Mrs. CAPITO, Mr. HOEVEN, Mrs. FEINSTEIN, Ms. KLOBUCHAR, Ms. HIRONO, and Mrs. GILLIBRAND) introduced the following bill; which was read twice and referred to the Committee on Banking, Housing, and Urban Affairs

A BILL

To require the Secretary of the Treasury to mint coins
in recognition of the fight against breast cancer.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Breast Cancer Aware-
5 ness Commemorative Coin Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds that—

1 (1) breast cancer is the most common cancer
2 among women of the United States, except for skin
3 cancers;

4 (2) today, about 1 in 8, or 12 percent of,
5 women in the United States will develop invasive
6 breast cancer, which is an increase from 1 in 11, or
7 9 percent of, women in 1975;

8 (3) breast cancer is the second leading cause of
9 cancer death in women;

10 (4) the chance of dying from breast cancer is
11 about 1 in 36;

12 (5) thanks to earlier detection, increased aware-
13 ness, and improved treatment, death rates from
14 breast cancer have decreased since 1989;

15 (6) there is a strong interest among the people
16 of the United States to do more to tackle breast can-
17 cer;

18 (7) the National Cancer Institute estimates that
19 \$18,100,000,000 was spent in the United States on
20 breast cancer care in 2014;

21 (8) finding a cure for breast cancer is a goal of
22 the United States Government;

23 (9) the National Institutes of Health dedicated
24 an estimated \$674,000,000 for breast cancer re-
25 search in fiscal year 2014;

1 (10) in fiscal year 2014, the Breast Cancer Re-
2 search Program of the Department of Defense re-
3 ceived \$120,000,000;

4 (11) while the National Institutes of Health
5 and the Department of Defense program on breast
6 cancer research remain the largest funders of breast
7 cancer research in the United States, funding for
8 the National Cancer Institute was reduced by nearly
9 \$66,000,000 between 2011 and 2013;

10 (12) the funding level for the Department of
11 Defense Breast Cancer Research Program has re-
12 mained consistent since 2012, but this amount rep-
13 resents a 20-percent decrease from 2011 funding
14 levels;

15 (13) additional private sector support for breast
16 cancer research will help find cures for breast cancer
17 even faster;

18 (14) it is estimated that, in the United States,
19 231,840 women will be diagnosed with, and 40,290
20 women will die of, breast cancer in 2015;

21 (15) on average, every 13 minutes a woman
22 dies of breast cancer in the United States;

23 (16) due to disease type and lack of adequate
24 care, African-American women have the highest
25 death rates of all racial and ethnic groups overall

1 and are at least 44-percent more likely to die of
2 breast cancer than women of other racial and ethnic
3 groups;

4 (17) breast cancer used to be considered a dis-
5 ease of aging but recent trends show that more ag-
6 gressive forms of the disease have been increasingly
7 diagnosed in younger women;

8 (18) breast cancer is the most frequently diag-
9 nosed cancer among nearly every racial and ethnic
10 group, including African-American, American In-
11 dian/Alaska Native, Asian/Pacific Islander, and His-
12 panic/Latina women;

13 (19) clinical advances resulting from research
14 have led to increased survival rates from breast can-
15 cer;

16 (20) since 1990, death rates from breast cancer
17 have dropped more than 34 percent;

18 (21) it is estimated that there will be 2,350 new
19 cases of invasive breast cancer and 440 breast can-
20 cer deaths among men in the United States in 2015;

21 (22) at this time there are more than 3,100,000
22 breast cancer survivors in the United States;

23 (23) it is estimated that breast cancer costs
24 \$12,500,000,000 in lost productivity;

1 (24) the losses of productivity due to breast
2 cancer will increase with the projected growth rate
3 and aging of the population of the United States if
4 cancer mortality rates stay constant in the future;

5 (25) there is a better chance of survival, and
6 there are more treatment options available, with
7 early stage detection through mammograms and
8 clinical breast exams;

9 (26) breast cancer is the most common cancer
10 in women worldwide, with an estimated 1,700,000
11 new cases of breast cancer among women worldwide
12 in 2012;

13 (27) the Breast Cancer Research Foundation
14 (hereafter in this Act referred to as “BCRF”) is
15 considered one of the most efficient cancer research
16 charities;

17 (28) of every dollar donated to BCRF, 91 cents
18 goes to research and awareness programs, 88 cents
19 towards research and 3 cents towards awareness;

20 (29) founded in 1993, BCRF has raised more
21 than \$500,000,000 to fuel discoveries in tumor biol-
22 ogy, genetics, prevention, treatment, survivorship,
23 and metastasis, making BCRF one of the largest
24 private funders of breast cancer research in the
25 world; and

1 (30) in 2014 and 2015, BCRF committed
2 \$58,600,000 in research, including \$11,600,000 to
3 the international Evelyn H. Lauder Founder's Fund
4 focused on metastasis, to support the work of more
5 than 220 researchers at leading medical institutions
6 across 6 continents, including 25 States and 14
7 countries.
